Sarah Kroeker from MTAM. FACT-MB Secretary.

Background Highlights

- There has been discussion among a small number of associations since 2011
- Momentum has grown in the past two years.
- Working with Barbara MacCallum to learn from the Ontario process.
- Conversations have also been had with the Nova Scotia College of Counselling Therapists.
- Nationally and specifically in Western Canada there is momentum in creating regulatory bodies and there has been presented the opportunity to borrow materials for our applications.

Work Thus Far:

-Draft Memorandum of Understanding – this document is the basis of agreement for all associations working together.

-the nature of the document reflects the small size of our federation.

-it is a living document

-openable for others to join the federation

-flexible for adjustment by voting members the federation

-Draft of the Definition and Scope of Practice

-lots of work involved in creating this document thus far

-built from many sources

-Website: www.fact-manitoba.org

-the FAQ has answers to many questions that association members may have.

-Moving forward:

-There is opportunity to borrow materials for the application from other provinces (eg. the competencies profile from BC).

-BC highly invested in this process in their province and have expressed their interest in help other.

-The spirit of working together, collaboration will be an asset to this process.

Mission/Vision:

Mission: Protection of the Public.

-The mission is NOT legitimizing our own professions.

Task: submitting an application for self-regulation under the Regulated Health Professions Act.

Vision: Establishing a College

Path Ahead:

-Adding associations to the Federation. Inclusiveness is key.

ACTION: each association must formally appoint a person (and an alternate) as representatives as soon as possible. This must be documented by member associations' board.

-FACT-MB is a federation of associations. FACT-MB voting members (and alternates) represent their associations.

-in the interim: individuals can participate as observers on behalf of their associations.

-“Observe” means you can contribute to the conversation while not having a vote until official sanction has been given.

ACTION: please look over and review the Memorandum of Understanding (MOU), the Definition and Scope of Practice with your board executives.

-Feel free to contact committee members with more familiarity with the process toward regulation if you have questions.

-Some committee members may be available to speak to you membership about the process and what self-regulation is/means and to answer membership questions.

Questions/Answers:

-Grandfathering? – Grandfathering is later in the process after the legislation is passed. A transitional council (or something similar) would likely be involved to start grandfathering.

-Money? –According to the MOU costs for this process will be shared between associations based on the proportion of the membership of each association. (MOU 12, 13)

-The cost incurred in NS was ~\$50,000. Ontario has spent much more

-RHPA – a template that professions can slot into. We don't need a bill to pass our legislation. This is simpler and theoretically less expensive than elsewhere.

-How many practitioners are represented by FACT-MB? ~450 members

-MOU indicates that member associations need to have ethics adjudication process and an ethics profile.

-FACT-MB is the place where the vigorous dialogue about the Standards of Practice.

NEXT MEETING: January 20, 2017 at 7:00 pm Miseracordia Health Centre 7th Floor Conference Room.

Respectfully submitted by,

Sarah Kroeker BMT, MTA
Secretary FACT-MB
